Author's Note

Dear Reader,

We are pleased to bring you our updated WTS Global Transfer Pricing (“**TP**”) Country Guide for Asia Pacific countries, featuring an overview of TP legislation; TP documentation requirements (including OECD BEPS¹ Action 13 documentation standard adoption); and practical TP considerations – in 21 countries in Asia Pacific.

A key aim of OECD BEPS is to enhance transparency along the multinational enterprise (“**MNE**”) regional or global value chain. The OECD BEPS Action item 13 therefore introduces a three tiered TP documentation requirement (comprising a Master File (“**MF**”), Local File (“**LF**”), and Country-by-Country Reporting (“**CbCR**”) based on meeting gross revenue or other thresholds in most countries.

The MF provides an overview of the MNE group, including its organisational structure, description of its business(es), the MNE’s intangibles, the intercompany financial activities, and the financial and tax positions. The MF is generally centrally prepared for the group and is included with the LF for each group entity that meets local TP Documentation thresholds. The need to prepare a MF is generally based on the revenue threshold of the local company and in Asia countries, can vary from being the same as the LF threshold (e.g. Hong Kong, Indonesia, South Korea, Thailand, the UAE and Vietnam), the same as the CbCR threshold (e.g. Japan and New Zealand) or not required at all (e.g. Cambodia, Laos and the Philippines).

The LF is the TP documentation for the local entity countries and it contains detailed information on significant intercompany transactions and demonstrates their arm’s length nature. The LF is an addition to the MF and both the LF and MF are only submitted to the local tax administration in line with local submission rules. The threshold and content requirements for preparing a LF differ across countries.

The CbCR requires reporting aggregate financial information per country and a list of group entities globally (including business activities), where consolidated group revenues meet or exceed EUR 750 million. The CbCRs are typically submitted within 12 months after the UPE fiscal year-end of the year to which the CbCR refers. The CbCR is prepared and submitted by the (parent) company (under a primary reporting obligation) or a designated company (under a secondary reporting obligation) – and shared by the receiving tax authority with other relevant tax authorities via an information exchange mechanism. Several countries require CbCR notifications to indicate in the tax return if and by which entity CbCR is prepared and submitted.

Since the publication of the final BEPS reports, most local countries have implemented the initiatives in Asia, with the exception of some developing countries. This Asia Pacific study includes the implementation status of OECD BEPS 13 and related practical TP practices in 21 countries as of March 2024. It is envisaged that this Transfer Pricing Guide will be updated regularly. Updates will be available on the following website: <https://www.wts.com/global/insights/country-tp-guide>.

We hope that you enjoy reading this Transfer Pricing Guide. Should you have any questions on TP or tax issues, please feel free to contact one of the colleagues in the relevant countries in the contact list. We will be happy to assist you.

¹ The Organisation for Economic Cooperation and Development (“OECD”) BEPS Action items. BEPS (Base Erosion and Profit Shifting) refers to tax planning strategies that exploit gaps and mismatches in tax rules to artificially shift profits to low-or no-tax jurisdictions where there are little or no economic activities.

1. Legal Basis

Is there a legal requirement to prepare TP documentation?

The preparation of TP documentation is not mandatory. However, penalties will apply for Taxpayers who don't meet the requirements set out in Subdivision 284-E and are precluded from establishing a reasonably arguable position in the event of a TP adjustment.

Since when does a TP documentation requirement exist in your country?

Division 13 was enacted in 1982 (current legislative framework since June 2013), at the discretion of the Commissioner of Taxation.

Adoption of the OECD or UN legislation in your country?

Australia is a member of the OECD and largely follows the OECD Guidelines in practice.

Is your country a member of the OECD, Inclusive Framework, or other OECD groups (e.g. BEPS)?

Yes.

Are TP policies of multinational enterprises in principle accepted by the tax authorities, if they are in line with the OECD TP Guidelines?

Yes, but some extra considerations may be required for issues around Cross Border Treasury and Financing transactions.

Which TP methods may be applied?

Methods include traditional transaction methods (e.g., Comparable Uncontrolled Price ("**CUP**"); Resale Price method ("**RPM**"); and Cost Plus method ("**CPM**")) and

traditional profits based methods (Profit Split ("**PS**"); and Transaction Net Margin Method ("**TNMM**")).

Any other method that results in an arm's length outcome is also acceptable. However, other methods should only be used where one of the other traditional transaction or profits based methods cannot be reliably applied.

Is there a stated preference for any particular TP methods?

The legislation requires Taxpayers to adopt the "most appropriate" TP method and refers to the OECD Guidelines in this regard.

Have the documentation requirements of OECD BEPS Action 13 already been implemented (i.e. the LF, MF, and CbCR concepts)?

Australia has adopted the OECD's three tiered documentation approach set out in BEPS Action 13, however, the LF differs from the OECD approach. The requirements are met through the lodgement of the LF, the MF (LCMSF), and the CbCR.

The Australian Local File requirements include entity and transactional information for risk profiling. There are two LF forms, simple and long form. The Australian LF does not include TP documentation such as functional analysis, adjustments, etc.

Reference to documentation and statements of local government or tax authorities regarding OECD BEPS implementation status

In response to key TP cases that questioned the relevance of the OECD Guidelines in interpreting Division 13 and the Australia Tax Office ("**ATO**")'s reliance on such interpretation, revised TP provisions were enacted. These provisions refer directly to the 2010 OECD Guidelines (or the 1999 Guidelines for earlier years) as relevant guidance for the determination of the arm's length conditions.

Australia

For years starting on or after 1 July 2017, the relevant guidance also incorporates the changes as per the 2017 amended version of the OECD Guidelines.

Is there any statute of limitation period?

Under Subdivisions 815-B, C, and D, amendments can be made within seven years following the date on which a notice of assessment is issued to the Taxpayer.

Historically, there has been no statute of limitations for TP adjustments. The tax legislation applicable for financial years starting before 1 July 2013 specifically empowers the Commissioner to make amendments to tax assessments in any year for TP adjustments under Division 13. As such, years starting before 1 July 2013 remain open to challenge indefinitely.

Adjustments can be made under Subdivision 815-A for any financial year starting between 1 July 2004 and 30 June 2013 (inclusive). Like Division 13, there is no limitation on when adjustments can be made.

Some of Australia's double tax agreements, including those with New Zealand and Japan, specify time limits for adjustments.

Reference to relevant articles of law, legislative regulation, or applicable administrative guidance that are in place for TP documentation in general.

Subdivision 284-E TAA 1953.

2. Master File (MF)

What is the (consolidated revenue) threshold requirement for the obligation to prepare a MF?

CbCR requirements apply to Country by Country Reporting Entity ("CbCRE")s, largely Australian Taxpayers that form part of an MNE with an annual global income of AUD 1 billion or more. While the definition of the global group generally follows accounting consolidation rules, there are exceptions to that are specific to Australia's MF submissions.

Euro Equivalent

EUR 601,365,000.

From which year does this obligation exist?

Years starting on or after 1 July 2017.

When does the MF need to be available?

As a CbCR reporting entity, the MF must be lodged directly with the ATO within 12 months after the end of the Taxpayer's year. The MF shall be maintained on a contemporaneous basis.

When does it need to be submitted?

If required, this must be filed 12 months after the end of the financial year of the Taxpayer unless the Taxpayer has received a Replacement Reporting Period ("RRP"), in which case the deadline is 12 months after the end of the RRP (typically the global parent entity's year immediately preceding the Taxpayer's year-end). An exemption may be available where Australia is the only jurisdiction in which the MF needs to be prepared.

Does the MF have to be prepared in the relevant local language?

The TP documentation needs to be maintained in English (local language) or be readily convertible into English.

Is documentation in English permissible?

Yes, it is required to be in English.

What are the possible consequences of not having the MF available?

Penalties?

Yes, penalties apply to the underpaid tax (shortfall penalties), failure to submit or late submission (failure to lodge penalties), or incorrect disclosures (false and misleading disclosure penalties). Failure to meet MF lodgement requirements could lead to penalties of up to AUD 782,500 per year.

Imprisonment?

No.

Shifting of the burden of proof?

No.

Other?

No.

Australia

To what extent do the local rules differ from the OECD standard regarding the OECD content requirements for the MF as shown in the BEPS implementation overview chart?

The prescribed information required to be disclosed in the MF is largely consistent with the OECD Action 13 requirements.

3. Local File (LF)

What is the threshold requirement for the obligation to prepare a LF?

CbCR requirements apply to CbCREs, largely Australian Taxpayers that form part of an MNE with an annual global income of AUD 1 billion or more. While the definition of global group generally follows accounting consolidation rules, some exceptions require careful consideration.

Further, if the local entity has less than AUD 2 million in total international related party transactions and no transactions that are on the exclusions list, it may submit the short form Local File.

Euro Equivalent

EUR 601,365,000.

From which year does this obligation exist?

Years starting on or after 1 July 2017.

When does the LF need to be available?

For CbCR reporting entities, an Australian LF must be filed 12 months after the end of the financial year of the Taxpayer. If the Taxpayer prepares and lodges at least Part A of the Australian Local File by the due date of the corporate tax return, questions 2 to 17 of the abovementioned IDS do not need to be completed (this is an “administrative concession” provided by the ATO).

When does the LF need to be submitted?

If required, an Australian Local File must be filed 12 months after the end of the financial year of the Taxpayer. If the Taxpayer prepares and lodges at least Part A of the Australian LF by the due date of the corporate tax return, questions 2 to 17 of the abovementioned IDS do not need to be completed (this is an “administrative concession” provided by the ATO).

Does the LF have to be prepared in the relevant local language?

The TP documentation needs to be maintained in English (local language) or be readily convertible into English.

Or is documentation in English permissible?

Yes, it is required to be in English.

What are the possible consequences of not having the LF available?

Penalties?

Yes, penalties apply to underpaid tax (shortfall penalties), failure to submit or late submission (failure to lodge penalties), or incorrect disclosures (false and misleading disclosure penalties). The Australian LF lodgement is mandatory for jurisdiction-by-jurisdiction Reporting Entities, and failure to lodge is subject to the same penalties.

Imprisonment?

No.

Shifting of the burden of proof?

No.

Other?

No.

To what extent do local rules differ from the OECD standard regarding the OECD content requirements for the LF as shown in the 2017 OECD TP Guidelines?

The prescribed information required to be disclosed in the LF, both Short Form and Long Form, is not consistent with the OECD Action 13 requirements.

The Australian LF requirements include entity and transactional information for risk profiling by the ATO. There are two LF forms, simple and long form. The Australian LF does not include TP documentation such as functional analysis, adjustments, etc as in the OECD content requirements.

4. Country-by-Country Reporting (CbCR)

Australia

What is the threshold requirement for the obligation to prepare Country-by-Country Reporting?

CbCR requirements apply to CbCREs, largely Australian Taxpayers that form part of an MNE with an annual global income of AUD 1 billion or more. While the definition of a global group generally follows accounting consolidation rules, some exceptions require careful consideration.

Euro Equivalent

EUR 601,365,000.

From which year does this CbCR obligation exist?

Years starting on or after 1 July 2017.

Are Taxpayers required to notify of CbCR filing in your country?

Yes.

If yes, when and how do the tax authorities need to be notified?

If the CbCR is lodged with another revenue authority with whom the ATO has a formal information exchange, the Australian Taxpayer can provide a notification through the LCMSF form, and the ATO then obtains a copy of the CbCR directly from the other revenue authority 12 months from the end of the relevant income year. CbCR notification is required annually.

For cases where multiple entities are not members of the same tax consolidated group, each entity will need to lodge a notification. There is an option for one entity to notify that it will be lodging the information on behalf of those entities, but it will need to state this within its notification.

If the reporting entity (ultimate parent or surrogate parent) is in your country, what is the CbCR submission deadline?

The CbCR (or the CbCR Notification if applicable) must be lodged directly with the ATO within 12 months after the end of the Taxpayer's year-end. If required, the CbCR is due 12 months after the end of the financial year of the Taxpayer unless the Taxpayer has received an RRP, in which case the deadline is 12 months after the end of the RRP.

Are there any deviating submission deadlines for the secondary mechanism?

No.

Does your country have a requirement that the financial figures of the group need to be aligned?

No.

Where is the CbCR to be submitted?

In addition to the LCMSF, Australian Taxpayers must lodge the CbCR in Australia through the use of a separate XML schema.

How is the CbCR to be submitted, specifically, is there any prescribed standard?

Where the CbCR is lodged in a jurisdiction that automatically exchanges it with the ATO, this lodgement can be replaced with a notification. Such CbCR lodgement notification is provided through the lodgement of the LCMSF, due 12 months after the end of the financial year.

It should be noted that where an Australian subsidiary has a different financial year-end from the Ultimate Parent Entity lodging the CbCR, a replacement reporting period will need to be established with the ATO, which can impact the deadlines for the CbCR.

A local lodgement is required if the CbCR is not lodged in a jurisdiction that automatically exchanges it with the ATO. This lodgement will need to be made through a separate XML and a conversion process is required to align the CbCR with the Australian requirements.

What are the possible consequences of not having the CbCR available?

Penalties?

Yes, penalties apply to underpaid tax (shortfall penalties), failure to submit or late submission (failure to lodge penalties), or incorrect disclosures (false and misleading disclosure penalties). Failure to lodge for SCEs ranges from AUD 156,500 to AUD 782,500.

Imprisonment?

No.

Australia

Shifting of the burden of proof?

No.

Other?

No.

To what extent do your local rules differ from the OECD standard regarding the content requirements for the CbCR as shown in the 2017 OECD TP Guidelines?

Consistent with OECD requirements.

Did your country sign the Multilateral Competent Authority Agreement on the Exchange of CbCR ("CbCR MCAA")?

Yes, it is as of 27 January 2016, with the dates on which exchange relations became active listed on the OECD website.

Did your country enter into other information exchange agreements, such as on a bilateral basis?

Yes, Australia has signed a bilateral agreement with the US.

Can a Taxpayer in your country fulfil his CbCR requirement by referring to the reporting entity in the same or another country?

Yes.

5. TP disclosure in the tax return or TP specific returns

Is there a threshold for Related Party Transactions?

In addition, if the aggregate number of transactions or dealings with international related parties, both revenue and capital in nature, is greater than AUD 2 million, the following information must be disclosed:

- › Top three transactions (individually) and other transactions (combined) for the top three specified "low tax" jurisdictions; and
- › The top three transactions and other transactions for the top three non-specified jurisdictions.

Does a Taxpayer need to disclose information regarding TP documentation in his tax return?

Related party disclosures may be required in the financial statement and annual report.

When a Taxpayer files a tax return for which he understands or should understand that the result reported in that tax return is too low due to incorrect TP, what could be the legal consequences?

Penalties apply to underpaid tax (shortfall penalties). Penalties depend on the entity as well as various other factors, such as the level of culpability.

Where the ATO concludes that an entity entered the arrangement with the sole or dominant purpose of that entity or another getting a TP benefit, the penalties will be either 50% or 25% of the TP shortfall amount, depending on whether the entity has appropriate documentation.

Higher penalties apply where there are further culpability factors such as intentional disregard for the law. These penalties are doubled for Significant Global Entities.

What could be the consequences for the tax advisor/accountant/administrator drafting and filing the tax return of a client where that advisor/accountant/administrator understands or should understand that the result reported is too low due to incorrect TP?

A self-assessment regime effectively requires public officers to determine whether the Taxpayer has received a TP benefit to satisfy their duties in signing off on the tax return. In extreme cases, the public officers may be liable for penalties if they do not discharge this responsibility.

Does a Taxpayer need to file TP specific returns?

No, other than those mentioned.

Please state the filing form number and name.

Together with income tax return lodging.

What would be the filing deadline?

In most cases, the income tax return is due for lodgement six months and 15 days after the end of the income tax year.

What would be the penalties for non-compliance?

Australia

Yes, penalties apply to failure to submit or late submission (failure to lodge penalties). Penalties depend on the entity as well as various other factors, such as the level of culpability.

Penalties for SGEs, i.e., any entity that is part of a group with a global turnover of AUD 1 billion or more, are particularly high. Failure-to-lodge penalties for these entities start at AUD 156,500 for filings that are one date late and gradually increase to AUD 782,500 for lodgements that are 112 days late or more.

6. Benchmarking

Is there any local guidance or requirement about the preparation of a benchmark study?

There are no formal guidelines on the determination of the appropriate point in the benchmarking interquartile range. Interquartile ranges calculated using spreadsheet quartile formulas are generally acceptable, but there may still be challenges in terms of the most appropriate point within the interquartile range (i.e., it is not necessarily accepted that if the tested party results fall within the interquartile range, it may automatically be concluded that such results are consistent with the arm's length principle).

The ATO practice is generally to use the median of the interquartile range and will generally only accept local comparable companies in the benchmarking. Only under extenuating circumstances where no local comparables can be identified would the ATO consider comparables from outside of Australia.

Is there any stated preference for local benchmarks?

Although there is no legal or formal requirement for local jurisdiction comparables, the ATO has a strong preference for local comparables and uses local databases that contain information on more companies than the typical regional and global databases.

The ATO will generally accept foreign comparables only if it can be demonstrated that reliable local comparables are not available. Regional Asian comparables are typically not accepted due to market differences.

Are there any materiality thresholds that apply to the requirement to have a benchmark study available?

Reportable Tax Position Schedule for companies with a turnover of more than AUD 25 million that form part of an Australian economic group with a turnover over AUD 250 million must be disclosed.

7. Year-end, secondary, and corresponding adjustments

Are year-end/ secondary/ corresponding adjustments permissible?

Yes, although there is no legislative requirement to make year-end adjustments.

Corresponding adjustments are not mandatory but are possible.

Does the Taxpayer have to comply with any specific features or guidance?

TR 2007/1: effect of determinations under Division 13, including consequential adjustments

TR 2000/16: for corresponding adjustments

8. TP Audit and Dispute Resolution Mechanisms

What are currently the main TP areas of scrutiny by the tax authorities in your country?

All top 1,100 companies in Australia are subject to review over a four year period, with the top 100 companies being subject to annual reviews. A similar review process has recently been started for large privately owned Australian companies.

The ATO has also recently selected companies in the pharmaceutical and technology industries for audits as well as Taxpayers with significant intragroup financing.

Outside these groups, the possibility of an annual tax audit in Australia is typically medium. However, if Taxpayers exhibit risk factors, the possibility of a review or audit increases significantly.

Where the Taxpayer enters a material level of international related party transactions, TP is almost always reviewed if any general tax review or audit is started.

Based on your experience, are joint or multilateral audits initiated and carried out?

Australia

Yes.

Does the Taxpayer have the option to apply for bilateral or multilateral APAs?

Yes, both unilateral and bilateral APAs are possible. The ATO's APA program is outlined in ATO PS LA 2015/4. A review of the APA program by the ATO is currently underway.

Are there any restrictions?

An APA in which the ATO is involved typically has a three to five year term.

Bangladesh

1. Legal Basis

Is there a legal requirement to prepare TP documentation?

According to TP regulations in Bangladesh, taxpayers are required to maintain TP documentation before the due date of filing the annual Corporate Tax return. However, they only need to submit the documentation to the tax authorities upon request. It's important to note that the data of comparable must be relevant to the financial year and therefore, there is a contemporaneous requirement.

Since when does a TP documentation requirement exist in your country?

Transfer pricing regulations in Bangladesh have been made effective from 1 July 2014 by SRO 161-Law/Income Tax/2014.

Adoption of the OECD or UN legislation in your country?

Bangladesh is not a member of the OECD. Its legislation is broadly based on the OECD Guidelines. Six methods prescribed in the Bangladeshi legislation to compute arm's length prices conform with the OECD Guidelines.

Is your country a member of the OECD, Inclusive Framework, or other OECD groups (e.g. BEPS)?

Bangladesh is not a member of the OECD, but it participates in the BEPS Inclusive Framework.

Are TP policies of multinational enterprises in principle accepted by the tax authorities, if they are in line with the OECD TP Guidelines?

Yes.

Which TP methods may be applied?

Bangladesh legislation prescribes the following methods: Comparable Uncontrolled Price ("**CUP**"); Resale Price method ("**RPM**"); Cost Plus method ("**CPM**"); Profit Split ("**PS**"); and Transaction Net Margin Method ("**TNMM**") and any other method. When it can be demonstrated that none of the first five methods can be reasonably applied to determine the arm's length price for an international transaction, Section 235 allows the use of any other method that can yield a result consistent with the arm's length price.

To determine a comparable uncontrolled transaction, the relevant rule provides that only the data pertaining to the relevant financial year should be used. However, the rule permits the use of data before the relevant financial year, if it can be substantiated that such data bears facts that could influence the analysis of comparability.

Is there a stated preference for any particular TP methods?

The legislation requires Taxpayers to adopt the "most appropriate" TP method.

Have the documentation requirements of OECD BEPS Action 13 already been implemented (i.e. the LF, MF, and CbCR concepts)?

No.

Reference to documentation and statements of local government or tax authorities regarding OECD BEPS implementation status

2. Master File (MF)

What is the (consolidated revenue) threshold requirement for the obligation to prepare a MF?

BDT 30000000.

Euro Equivalent

EUR 250,000.

When does the MF need to be available?

When international transaction with associated parties exceeds BDT 30 million.

When does it need to be submitted?

When the TP officer asks for the MF.

Does the MF have to be prepared in the relevant local language?

As the TP laws are in the local (Bengali) language, the documentation should be prepared in the local language.

Is documentation in English permissible?

What are the possible consequences of not having the MF available?

Penalties?

1% of the international transaction amount.

Imprisonment?

No.

Shifting of the burden of proof?

No.

Other?

No.

To what extent do the local rules differ from the OECD standard regarding the OECD content requirements for the MF as shown in the BEPS implementation overview chart?

Bangladesh TP rules are broadly based on the OECD TP Guidelines.

What is the threshold requirement for the obligation to prepare a LF?

There is an applicable materiality limit in Bangladesh for the purpose of preparing TP documentation in LF based on aggregate transaction values of Bangladesh taka (BDT) 30 million.

Euro Equivalent

EUR 250,000.

From which year does this obligation exist?

From 26 June 2014. Applicable for Year of Assessment 2015-2016.

When does the LF need to be available?

TP documentation is required to be maintained by the taxpayer on or before the due date of filing the TP return.

When does the LF need to be submitted?

When the TP officer asks for the LF.

Does the LF have to be prepared in the relevant local language?

Bangladesh

As the TP laws are in the local (Bengali) language, the documentation should be prepared in the local language.

Or is documentation in English permissible?

Yes, English is also acceptable in Bangladesh.

What are the possible consequences of not having the LF available?

Penalties?

Yes, penalties apply for:

- › Failure to keep, maintain or furnish any information or documents as required by Section 237 of the Act, the taxpayer faces a penalty not exceeding 1% of the value of the international transaction.
- › Failure to comply with the notice or requisition under Section 235 of the Act by the Deputy Commissioner of Taxes, the taxpayer faces a penalty not exceeding 1% of the value of the international transaction.
- › Failure to file an Statement of International Transactions (“SIT”), there is a penalty of 2% of the value of the international transaction under Section 238 of the Act.
- › Not furnishing an accountant’s certificate, the taxpayer is fined an amount not exceeding BDT300,000.

Imprisonment?

5. TP disclosure in the tax return or TP specific returns

Is there a threshold for Related Party Transactions?

There is an applicable materiality limit in Bangladesh for the purpose of preparing TP documentation based on aggregate transaction values of Bangladesh taka (BDT) 30 million.

Not applicable for domestic transactions.

Does a Taxpayer need to disclose information regarding TP documentation in his tax return?

Under Section 238 of the Act, every person that has entered into an international transaction shall furnish, along with the return of income, an SIT in the form and manner as may be prescribed.

Under Section 239, the Deputy Commissioner of Taxes may, by written notice, ask for an accountant's report certifying that the documents and information maintained by a taxpayer are in line with Bangladesh's TP regulations, provided the taxpayer is entering into an international transaction in which the aggregate value of the international transactions entered into by the taxpayer exceeds BDT30 million.

6. Benchmarking

Is there any local guidance or requirement about the preparation of a benchmark study?

Bangladesh TP legislation has not provided any preference for single-year or multiyear testing. As per Bangladesh TP laws, in case six or more data sets are being used, the arm's length price shall be considered as the range of the 30th percentile to the 70th percentile. A fresh benchmarking search every year is preferable.

The regulations do not explicitly provide guidance in relation to the use of contemporaneous data but the relevant rule provides that only the data pertaining to the relevant financial year should be used. However, the rule permits the use of data before the relevant financial year, if it can be substantiated that such data bears facts that could influence the analysis of comparability.

4. Country-by-Country Reporting (CbCR)

What is the threshold requirement for the obligation to prepare Country-by-Country Reporting?

A group having entities/operations in two or more jurisdictions and consolidated group revenue for the preceding accounting period of at least EUR 750 million (i.e. HKD 6.8 billion approx.).

Euro Equivalent

EUR 750 million.

From which year does this CbCR obligation exist?

For accounting periods on or after 1 January 2018, CbCR is required to be prepared and submitted within 12 months after the end of the UPEs accounting period when there is a CbCR filing obligation (i.e. when the threshold has been met or exceeded).

Hong Kong

The same preparation and submission deadline applies to all MNEs regardless of the location of their headquarters.

Are Taxpayers required to notify of CbCR filing in your country?

Yes.

If yes, when and how do the tax authorities need to be notified?

A Hong Kong entity of a reportable group is required to give notification on the CbCR for an accounting period. Under normal circumstances, the UPE of the HK MNEs would be the reporting entity. If the UPE is in a jurisdiction that does not require CbCR filing or exchange of reports with HK, constituent entities of the MNE in HK could be subject to a secondary filing obligation.

CbCR notifications are due within 3 months after the end of the reportable group's accounting period. There is no specific date as the end date of the accounting year for the UPEs might be different. CbCR notifications are required to be submitted on a yearly basis.

If an MNE has more than one entity in Hong Kong, one entity can act as the reporting entity and file on behalf of all other entities. The CbCR notification is separately filed, although Hong Kong Taxpayers are required to confirm CbCR compliance in the revised tax returns, from YA19.

If the reporting entity (ultimate parent or surrogate parent) is in your country, what is the CbCR submission deadline?

12 months from the end of the relevant accounting period to which the CbCR.

Are there any deviating submission deadlines for the secondary mechanism?

No.

Does your country have a requirement that the financial figures of the group need to be aligned with?

No.

Does your country have a requirement that the financial years of the group need to be aligned?

No. Information in the CbCR should reflect on a consistent basis either:

- (a) Information for the fiscal year of relevant group entities ending on the same date as the fiscal year of the reporting entity, or ending within the 12 month period preceding such date; or
- (b) Information for relevant group entities for the fiscal year of the reporting entity.

Where is the CbCR to be submitted?

The CbCR is to be submitted via the CbC Reporting Portal.

How is the CbCR to be submitted, specifically, is there any prescribed standard?

The IRD has developed a data scheme in XML which is based on the CbC Return XML Schema v2.0 issued by the OECD.

What are the possible consequences of not having the CbCR available?

Penalties?

Yes.

For failure to file or notify CbCR without a reasonable excuse will trigger a fine at level 5 (i.e. HKD 50,000), with a further fine of HKD 500 for every day thereafter under certain conditions, along with a court order. On failure to comply with the court order, the fine will be at level 6 (i.e. HKD 100,000).

For filing misleading, false or inaccurate information, the fine will be at level 5 (i.e. HKD 50,000) and if filed with wilful intent, penalties will be either on summary conviction (i.e., a fine at HKD 10,000 and imprisonment for 6 months) or on conviction on indictment (i.e., a fine at HKD 50,000 and imprisonment for 3 years).

These penalties related to CbCR apply to directors and key officers as well as service providers engaged by the reporting entity.

Imprisonment?

Yes.

For filing misleading, false or inaccurate information, the fine will be at level 5 (i.e. HKD 50,000) and if filed

Hong Kong

with wilful intent, penalties will be either on summary conviction (i.e., a fine at HKD 10,000 and imprisonment for 6 months) or on conviction on indictment (i.e., a fine at HKD 50,000 and imprisonment for 3 years).

These penalties related to CbCR apply to directors and key officers as well as service providers engaged by the reporting entity.

In addition to the TP penalties stated above, the IRD can impose penalties for the broader corporate tax related issues.

Yes, Hong Kong signed the CbC MCAA on 26 July 2018.

Can a Taxpayer in your country fulfil his CbCR requirement by referring to the reporting entity in the same or another country?

Yes.

5. TP disclosure in tax return or TP specific returns

Is there a threshold for Related Party Transactions?

Form S2 needs to be completed where:

- (a) Taxpayer has transactions with non resident associated persons; or
- (b) Taxpayer had entered into an advance pricing arrangement with the Commissioner; or
- (c) Taxpayer belonged to a multinational enterprise group ("**MNE Group**") which has the obligation to file CbCR in Hong Kong or elsewhere; or
- (d) Taxpayer is a constituent entity of a multinational enterprise group with a total consolidated group revenue of at least EUR750 million, or an equivalent amount as at the accounting period end date, for the immediate preceding accounting period.

Does a Taxpayer need to disclose information regarding TP documentation in his tax return?

Hong Kong

Yes, the IRD requires Taxpayers to disclose certain related party information (i.e., the location of the non-resident associated persons) and confirm their TP documentation compliance in the profits tax return BIR 51 and form Supplementary form S2 (TP).

When a Taxpayer files a tax return for which he understands or should understand that the result reported in that tax return is too low due to incorrect TP, what could be the legal consequences?

Penalties would be imposed where a tax return was filed with incorrect information on TP without a reasonable, rationale or with the intent to evade tax. Taxpayers will be liable for an administrative penalty, calculated as an additional tax not exceeding the amount of tax undercharged. Section 82A(1G) provides that no additional tax should be imposed on a Taxpayer who proves reasonable efforts have been made to determine the arm's length amount.

It is worth noting that the IRD has not ruled out the possibilities of imposing more stringent penalties or initiating criminal prosecutions on blatant cases in accordance with relevant provisions of the IRO. The availability of TP documentation alone will not qualify for an exemption from penalties, but will be considered in determining whether individual Taxpayers have a "reasonable excuse" to be exempt from the penalties.

What could be the consequences for the tax advisor/accountant/administrator drafting and filing the tax return of a client where that advisor/accountant/administrator understands or should understand that the result reported is too low due to incorrect TP?

Not specified.

Does a Taxpayer need to file TP specific returns?

No, other than those mentioned.

Please state the filing form number and name.

IRD announced on 23 January 2019 a revised profits tax return for corporations (i.e., BIR51 and a set of new Supplementary Forms S1 to S10).

From YA19, Hong Kong Taxpayers are required to disclose certain related party information (i.e., the location of the non-resident associated persons) and

confirm their TP documentation compliance in the BIR51 and Supplementary Form S2, TP.

Form S2 is an additional form to the profits tax return for TP purposes. In addition, having declared the obligation to prepare Master File and Local File in the Supplementary Form S2 of the profits tax return, selected Taxpayers may be requested to complete Form IR1475, TP Documentation — Master File and Local File, electronically and submit it to the IRD within one month upon receipt of the request.

What would be the filing deadline?

Generally, profits tax returns should be filed within 1 month from the date of issue. The annual profits tax returns are issued in early April and are due for filing in May.

For cases with tax agents, the tax filing due dates are extended to mid August and mid November for entities with an accounting period that falls between (i) 1 Dec to 31 Dec and (ii) 1 January to 31 March respectively.

What would be the penalties for non-compliance?

The IRD may impose penalty, Estimated Assessment or even prosecution against any Taxpayer who without reasonable excuse fails to furnish a return in time. In this regard, the offence is subject to a fine in the amount of HKD 10,000 and a further fine of triple the amount of the tax undercharged. In addition, the Court may order the convicted Taxpayer to furnish the return within a specified time.

6. Benchmarking

Is there any local guidance or requirement with regard to the preparation of a benchmark study?

Yes. DIPN 46 recommends maintaining a benchmarking/comparability analysis, consistent with OECD requirements.

The IRD has publicly endorsed the use of BVD's Osiris and S&P databases. In practice, regional comparables are accepted where sufficient local comparables cannot be found. The benchmarking analysis should be part of the Local File, which should include:

- › Selection of the most appropriate TP method/tested party and reasons for the same;
- › Important assumptions made in applying the TP method;

Hong Kong

- › If relevant, an explanation of reasons for performing a multi-year analysis;
- › A list and description of selected comparable transactions (internal or external), their financial information, a description of the search process and sources of information used;
- › Description of any comparability adjustments performed, and whether adjustments were made to tested party/comparables or both;
- › Reasons for concluding that Taxpayer's related party transactions were at arm's length basis based on the selected TP method; and
- › Financial information used in applying the TP methodology.

Is there any stated preference for local benchmarks?

The quality of comparable data is more important than the number of comparables identified. DIPN 59 suggests that Hong Kong comparables should be considered in the first instance. If there are no Hong Kong comparables, or the potential Hong Kong comparable companies identified are not applicable, then it may be necessary to consider using comparables from other jurisdictions.

Appropriately selected overseas data is accepted by the IRD. Jurisdictions recognised as Hong Kong's closest reference jurisdictions in terms of demographics, size of economy and stage of economic development should be considered.

Are there any materiality thresholds that apply to the requirement to have a benchmark study available?

Yes. The same thresholds relevant for Master File and Local File apply. The same or similar market principle is important.

7. Year-end, secondary, and corresponding adjustments

Are year-end/ secondary/ corresponding adjustments permissible?

Yes.

Does the Taxpayer have to comply with any specific features or guidance?

No, not specified.

8. TP Audit and Dispute

What are currently the main TP areas of scrutiny by the tax authorities in your country?

Particular scrutiny is accorded to services fees paid/received (specifically intragroup services/management fees), financial transactions, royalties etc.

Other scenarios in which a tax audit may be triggered include:

- › fluctuating profit margins,
- › if the accounts of a business are heavily qualified,
- › profits or turnover are deemed unreasonably low,
- › filing of tax returns is persistently delayed or omitted,
- › business records are not properly maintained, or
- › requested information is not provided.

Based on your experience, are joint or multilateral audits initiated and carried out?

No.

Does the Taxpayer have the option to apply for bilateral or multilateral APAs?

Yes, there is an APA program available in Hong Kong. The APA program will cover unilateral, bilateral and multilateral agreements.

Are there any restrictions?

The existing APA regime was provided under the Departmental Interpretation and Practice Notes No. 48 which is not legally binding.

APA application is open to all (i) residents and (ii) non-residents with a HK permanent establishment, who are subject to profits tax and have HK pertinent related party transactions.

The annual threshold for an APA application is HKD80 million for sale and purchase of goods, HKD40 million for services, or HKD20 million for intangible properties. In general, an APA will apply for 3 to 5 years, with rollbacks available. Currently the IRD is prepared to consider bilateral or multilateral APA applications only.

Typical information/documentation required to be set out in an APA case plan includes:

Hong Kong

- (a) functional analysis and industry analysis;
- (b) details of proposed TP methodology;
- (c) terms, conditions and assumptions behind applying the TP methodology;
- (d) data showing that the TP methodology will produce an arm's length result; and
- (e) information/documentation agreed in the pre filing meeting. Taxpayers are required to submit an annual compliance report for each year of the APA.

New Zealand

1. Legal Basis

Is there a legal requirement to prepare TP documentation?

Yes, on a contemporaneous basis. TP documentation is prepared annually to support the annual income tax position. While there is no statutory obligation to maintain documentation, New Zealand's tax system operates on a self assessment basis, where the Taxpayer is expected to keep sufficient contemporaneous records to support its tax position. Accurate and contemporaneous TP documentation supporting that the Taxpayer's transfer prices are consistent with the arm's length principle, in light of the relevant facts and circumstances, is a key element for addressing this requirement.

While the New Zealand TP rules require the application of the OECD Guidelines, IR provides some additional New Zealand specific simplified guidelines detailing their expectations for producing local TP documentation around financing arrangements.

Since when does a TP documentation requirement exist in your country?

It is expected for income years commencing on or after 1 January 2016.

Adoption of the OECD or UN legislation in your country?

OECD.

Is your country a member of the OECD, Inclusive Framework, or other OECD groups (e.g. BEPS)?

New Zealand is a member of the OECD inclusive framework as of 12 May 2016.

Are TP policies of multinational enterprises in principle accepted by the tax authorities, if they are in line with the OECD TP Guidelines?

The OECD's TP Guidelines for multinational enterprises and tax administrations (2022) are legislated in New Zealand's TP rules.

However, the local TP legislation includes novel sections assessing the deductibility of interest expense connected to inbound loans from associated parties, which can lead to outcomes that may differ from the OECD Guidelines. These specific rules are unique to New Zealand.

Which TP methods may be applied?

New Zealand legislation presents 5 available TP methods to determine an arm's length consideration for those cross-border associated party transactions undertaken by a New Zealand Taxpayer.

IR accepts the most reliable method (or combination of methods) chosen from among these methods: Comparable Uncontrolled Price ("CUP"); Resale Price method ("RPM"); Cost Plus method ("CPM"), Profit Split ("PS"); and Transaction Net Margin Method ("TNMM").

Is there a stated preference for any particular TP methods?

The most appropriate method should be used.

Have the documentation requirements of OECD BEPS Action 13 already been implemented (i.e. the LF, MF, and CbCR concepts)?

Yes, the IRD endorses OECD's recommendations and believes that the MF and LF approach provides a platform through which Taxpayers, subject to the local TP regime, can meaningfully describe their compliance with the arm's length standard. The IRD expects New Zealand Taxpayers to maintain contemporaneous TP documentation in two forms:

- › A MF providing an overview of the multinational's global business operations and

New Zealand

- TP policies; and
- › A LF providing detailed information regarding the operations of the New Zealand Taxpayer and main cross-border associated party transactions, as well as TP analysis supporting the arm's length nature of these transactions from a New Zealand perspective.

Only New Zealand based groups with revenue higher than EUR750 million are required to lodge CbCR. There are currently 20 NZ HQ MNCs that fall into this category.

Reference to documentation and statements of local government or tax authorities regarding OECD BEPS implementation status

New Zealand introduced new legislation addressing OECD's BEPS initiative, which is effective for the income years commencing on or after 1 July 2018.

Is there any statute of limitation period?

The IRD generally has 4 years from the end of the tax year in which a Taxpayer files an income tax return to investigate and amend the tax position taken by the Taxpayer. However, the 4-year time bar is extended to 7 years for TP tax positions.

This extension applies only in cases where the IRD notifies the Taxpayer that a tax audit or investigation has commenced within the standard 4-year period.

Reference to relevant articles of law, legislative regulation, or applicable administrative guidance that are in place for TP documentation in general.

Relevant guidance includes:

- › Sections YD 5, GB 2, and GC 6 to GC 14 of the Income Tax Act 2007 ("ITA");
- › Sections GC15 to GC19 (interest limitation rules);
- › The Tax Administration Act 1994 ("TAA"); and
- › New Zealand's double tax agreements.

What is the (consolidated revenue) threshold requirement for the obligation to prepare a MF?

New Zealand based groups with a revenue higher than EUR 750 million.

Euro Equivalent

EUR 750 million.

From which year does this obligation exist?

For income years commencing on or after 1 January 2016.

When does the MF need to be available?

The MF is expected to be made available to IR on request.

When does it need to be submitted?

The MF should be prepared by the date on which the relevant income tax return is filed.

Does the MF have to be prepared in the relevant local language?

It is expected that local TP documentation is prepared in the local language (English). The IRD could require that documents in other languages be translated.

Is documentation in English permissible?

Yes.

What are the possible consequences of not having the MF available?

Penalties?

Yes.

Imprisonment?

No.

Shifting of the burden of proof?

No.

Other?

No.

To what extent do the local rules differ from the OECD standard regarding the OECD content requirements for the MF as shown in the BEPS implementation overview chart?

New Zealand

The prescribed information required to be disclosed in the MF and LF is consistent with the OECD Action 13 requirements with some additional requirements around financing arrangements.

3. Local File (LF)

What is the threshold requirement for the obligation to prepare a LF?

New Zealand based groups with a revenue higher than NZD 1.3 billion.

Euro Equivalent

For income years commencing on or after 1 January 2016.

When does the LF need to be available?

The LF is expected to be made available to the IRD on request and Taxpayers are generally given 60 days from the date of request to file the LF.

When does the LF need to be submitted?

While each case is different, based on our experience, a Taxpayer generally is given 20 working days to submit the documentation upon request.

Does the LF have to be prepared in the relevant local language?

It is expected that local TP documentation is prepared in the local language (English). The IRD could require that documents in other languages be translated.

Or is documentation in English permissible?

Yes.

What are the possible consequences of not having the LF available?

Penalties?

Yes, if the LF is not produced within 60 days from request, or is considered to be inadequate, the penalty is up to 40% of the tax assessed on the TP items in the

tax return that are unsupported by an adequate or correct local file submission.

Imprisonment?

No.

Shifting of the burden of proof?

No.

Other?

No.

To what extent do local rules differ from the OECD standard regarding the OECD content requirements for the LF as shown in the 2017 OECD TP Guidelines?

The prescribed information required to be disclosed in the MF and LF is consistent with the OECD Action 13 requirements with some additional requirements around financing arrangements.

4. Country-by-Country Reporting (CbCR)

What is the threshold requirement for the obligation to prepare Country-by-Country Reporting?

Euro Equivalent

EUR 750 million.

From which year does this CbCR obligation exist?

For income years commencing on or after 1 January 2016.

Are Taxpayers required to notify of CbCR filing in your country?

If yes, when and how do the tax authorities need to be notified?

New Zealand

If the reporting entity (ultimate parent or surrogate parent) is in your country, what is the CbCR submission deadline?

A CbCR, if required, must be filed within 12 months after the relevant balance date. This applies to New Zealand headquartered groups only.

Are there any deviating submission deadlines for the secondary mechanism?

No.

Does your country have a requirement that the financial figures of the group need to be aligned with?

No.

Does your country have a requirement that the financial years of the group need to be aligned with?

No.

Where is the CbCR to be submitted?

The IRD's CbCR guidance states that the IRD will individually contact each group that is required to participate in CbCR, it is likely that these Taxpayers will be able to email their reporting directly to an IRD investigator.

Alternatively, the IRD maintains a generic postal address where all mail can be sent.

How is the CbCR to be submitted, specifically, is there any prescribed standard?

The data is provided using the following form:
<http://www.ird.govt.nz/resources/9/f/9f96d3a8-1c8b-49e4-852f-3ec3bcbcb8a31/cbc-report.pdf>

Did your country enter into other information exchange agreements, such as on a bilateral basis?

Yes.

Can a Taxpayer in your country fulfil his CbCR requirement by referring to the reporting entity in the same or another country?

No.

5. TP disclosure in the tax return or TP specific returns

Is there a threshold for Related Party Transactions?

A Taxpayer's income tax return requires disclosure of:

- › Whether the Taxpayer made payments to non-residents (such as dividends, interest, management fees, "know how" payments, royalties, or contract payments); and
- › Whether the Taxpayer holds an interest in a controlled foreign company ("CFC"), when relevant.

Does a Taxpayer need to disclose information regarding TP documentation in his tax return?

TP Documentation and Policy are required on a contemporaneous basis. Although there is no explicit legislative requirement for a Taxpayer to document its

New Zealand

TP policies and practices, TP documentation supporting the tax position should be prepared before the date the relevant income tax return is filed.

Local Taxpayers who prepare and maintain accurate and contemporaneous TP documentation is less likely to be exposed to penalties. IR will generally request a copy of the TP documentation as part of an income tax audit or TP risk assessment.

When a Taxpayer files a tax return for which he understands or should understand that the result reported in that tax return is too low due to incorrect TP, what could be the legal consequences?

Knowingly or carelessly under reporting income is an offence under the Tax Administration Act 1994. An offence is committed when a Taxpayer knowingly commits a specified act, or fails to act, about that Taxpayer's tax obligations and in either case, does so intending to evade tax or to obtain a refund or a tax payment: S143B of the Tax Administration Act 1994.

The offence of evasion is also committed when a Taxpayer evades or attempts to evade the payment or assessment of tax. The penalty for evasion is a fine of not more than NZD 50,000; a term of imprisonment of not more than 5 years, or both.

What could be the consequences for the tax advisor/accountant/administrator drafting and filing the tax return of a client where that advisor/accountant/administrator understands or should understand that the result reported is too low due to incorrect TP?

The offence of evasion, as described above, is also committed when a person evades or attempts to evade the payment or assessment of tax for another person. The penalty for evasion is a fine of not more than NZD 50,000; a term of imprisonment of not more than 5 years, or both. In practice, it is rare for tax advisors to be prosecuted for this offence.

There is also a separate "promoter penalty". The promoter penalty applies where a Taxpayer becomes a party to the arrangement and, as a result of the arrangement, a shortfall penalty is imposed for taking an abusive tax position, and the arrangement is offered, sold, issued, or promoted in a tax year to at least 10 persons who claim tax related benefits as a result of the arrangement.

Does a Taxpayer need to file TP specific returns?

There is no separate TP return required to be filed in New Zealand (notwithstanding the disclosures outlined above). However, the IRD regularly requires that MNEs and branches complete detailed TP questionnaires as part of their routine TP risk assessment activities.

Please state the filing form number and name.

IR1250.

What would be the filing deadline?

For balance dates ending between 1 October to 31 March, the filing deadline is 7 July. For balance dates ending between 1 April to 30 September, the deadline is the 7th day of the 4th month following the balance date. Where the company is on a tax agency list (the most common scenario), an extension to the following 31 March is granted.

What would be the penalties for non-compliance?

Even though there are no specific submission requirements, any failure to provide information or documentation when requested can constitute an offence.

6. Benchmarking

Is there any local guidance or requirement about the preparation of a benchmark study?

There is no requirement to conduct a fresh search every year. The best practice in New Zealand is to conduct a fresh search every 3 years, with financial updates in the interim years.

Is there any stated preference for local benchmarks?

Local benchmarking is preferred (Australian comparables are generally the best option if New Zealand benchmarks are not available); however, reliable benchmarks based on other jurisdictions (the UK or North America) are also acceptable. APAC benchmarks are often not accepted by the IRD based on the dissimilarity of the market compared to New Zealand.

New Zealand

Are there any materiality thresholds that apply to the requirement to have a benchmark study available?

Benchmarks should be independent. That said, there is no guidance related to specific independence criteria when completing benchmarking analysis. Comparability is a key aspect when completing benchmarking analysis, and the IRD endorses OECD guidance related to this.

7. Year-end, secondary, and corresponding adjustments

Are year-end/ secondary/ corresponding adjustments permissible?

Yes. If a methodology has been challenged, there is a high risk that an adjustment will be proposed and a dispute process will commence. Disputes have typically been resolved through settlement before litigation.

Does the Taxpayer have to comply with any specific features or guidance?

There are no specific regulations on TP adjustments. Generally, it should be to a point within the interquartile range.

8. TP Audit and Dispute Resolution Mechanisms

What are currently the main TP areas of scrutiny by the tax authorities in your country?

Yes, the methodology being challenged depends on the complexity of the cross-border associated party transaction. Transactions involving the provision of intangibles, financing, and intragroup services tend to receive higher scrutiny during a TP risk review.

New Zealand subsidiaries that provide sales and marketing services to an offshore principal or carry-on various marketing related activities can expect a more detailed TP review. Financing transactions are also subject to a high level of challenge.

Based on your experience, are joint or multilateral audits initiated and carried out?

No.

Does the Taxpayer have the option to apply for bilateral or multilateral APAs?

Section 91E of the TAA allows a unilateral APA to be issued in the form of a binding ruling. Bilateral or multilateral APAs may be entered into, under New Zealand's double tax agreements under the MAP provisions.

The IRD has not established any formal process for APAs, as each case is considered to be different, depending on a Taxpayer's specific facts and circumstances. The IRD encourages pre application conferences to make the APA application process less time consuming.

Unilateral APAs are more common in New Zealand and are actively encouraged by the IRD.

Are there any restrictions?

APAs are given in the form of a private binding ruling. Binding rulings bind the Commissioner of the IRD to apply the tax laws ruled on in the manner stated in the binding ruling, as long as the description of the relevant "arrangement" is accurate and does not change after the ruling is issued, and as long as any conditions stipulated by the IRD are adhered to by the Taxpayer. The Taxpayer is not otherwise bound by the ruling.

5. TP disclosure in the tax return or TP specific returns

Is there a threshold for Related Party Transactions?

A Taxpayer must disclose all related party transactions irrespective of the amount. The materiality threshold is relevant only in determining who is required to prepare TP documentation.

Does a Taxpayer need to disclose information regarding TP documentation in his tax return?

Yes. In addition, if a Taxpayer is not required to file the RPT Form, such must be disclosed in the Notes to the Financial Statements.

When a Taxpayer files a tax return for which he understands or should understand that the result reported in that tax return is too low due to incorrect TP, what could be the legal consequences?

Taxpayers may be subjected to deficiency taxes upon tax audit. Further, if the over declaration/ under declarations amount exceeds the relevant threshold for fraud, criminal penalties may likewise be imposed.

Also, Taxpayers who have not prepared adequate documentation may find their application for MAP rejected or that the TP issue would be much more difficult to resolve. However, no specific penalties were mentioned.

What could be the consequences for the tax advisor/accountant/administrator drafting and filing the tax return of a client where that advisor/accountant/administrator understands or should understand that the result reported is too low due to incorrect TP?

Section 13 of the Revenue Regulations 02-2013 states that the provisions of the Tax Code and other applicable laws regarding the imposition of penalties and other appropriate sanctions shall be applied to any Taxpayer who fails to comply with or violates the provisions and requirements of these regulations.

Does a Taxpayer need to file TP specific returns?

Yes.

Please state the filing form number and name.

The BIR Form No. 1709, Information Return on Transactions with Related Party (Domestic and/or Foreign) ("RPT Form").

What would be the filing deadline?

The RPT Form is filed as an attachment to the Annual Income Tax Return which must be filed on or before the 15th day of the 4th month following the close of the Taxpayer's taxable year.

What would be the penalties for non-compliance?

The TP regulations adopt the provisions of the Tax Code and other applicable laws in imposing penalties on any Taxpayer who fails to comply with or who violates the regulations.

6. Benchmarking

Is there any local guidance or requirement about the preparation of a benchmark study?

Philippines

Yes. Benchmarking is commonly known as "comparability analysis". It entails an analysis of the similarities and differences in the conditions and characteristics that are found in the associated enterprise transaction with those in an independent party transaction.

Once the impact of these similarities or differences on the transfer price has been determined, the arm's length price/margin (or a range) can then be established using an appropriate TP method.

Is there any stated preference for local benchmarks?

There is no legal requirement for local jurisdiction comparables, but local comparable companies are used because the BIR requires the most reliable companies and uses local companies in determining the arm's length price of intercompany transactions. Asia Pacific comparables would be acceptable if it can be shown that no local comparables are available.

Are there any materiality thresholds that apply to the requirement to have a benchmark study available?

No.

7. Year-end, secondary, and corresponding adjustments

Are year-end/ secondary/ corresponding adjustments permissible?

Yes.

Does the Taxpayer have to comply with any specific features or guidance?

There is none specified.

8. TP Audit and Dispute Resolution Mechanisms

What are currently the main TP areas of scrutiny by the tax authorities in your country?

Provision for administrative and other support (back-end) services, outsourced front-end services, shared services, sale and distribution of goods, manufacturing of goods (both full-fledged and toll), royalties, leasing real property, interest on intercompany advances/loans, income and expenses shifted in favour of a related company with special tax privileges such as Board of Investments ("BOI") Incentives and Philippine

Economic Zone Authority ("PEZA") fiscal incentives will further be scrutinised.

Based on your experience, are joint or multilateral audits initiated and carried out?

No.

Does the Taxpayer have the option to apply for bilateral or multilateral APAs?

Yes. However, there are still no guidelines providing for the mechanism/procedure to govern the same.

Are there any restrictions?

Though not mandatory, if a Taxpayer avails itself of an APA, it may choose freely between a unilateral and bilateral/multilateral APA. If the Taxpayer does not choose to enter into an APA and its transactions are subject later on to TP adjustments, it may still invoke the MAP Article to resolve double taxation issues. It is said that a separate guideline was to be issued regarding the application of APA and MAP processes.

Singapore

1. Legal Basis

Is there a legal requirement to prepare TP documentation?

Yes, Section 34F legislates the mandatory requirement for contemporaneous and adequate TP documentation, and penalties for non-compliance from YA 2019 onward.

Since when does a TP documentation requirement exist in your country?

2006.

Adoption of the OECD or UN legislation in your country?

OECD.

Is your country a member of the OECD, Inclusive Framework, or other OECD groups (e.g. BEPS)?

Yes, Singapore is a member of the Inclusive Framework.

Are TP policies of multinational enterprises in principle accepted by the tax authorities, if they are in line with the OECD TP Guidelines?

Yes. If Taxpayers have prepared similar TP documentation (e.g. OECD MF and LF) for the purpose of complying with the requirements of other tax jurisdictions, such documentation, if relevant to the business operations in Singapore, may form part of the TP documentation for Singapore tax purposes.

Which TP methods may be applied?

There are no provisions for TP methods in the domestic law. However, the Singapore TP Guidelines (Section 5) sets out the TP methods that Taxpayers can use to price their transactions with related parties.

The Guidelines provide for all methods described in the OECD TP Guidelines (Comparable Uncontrolled Price (“CUP”); Resale Price method (“RPM”); Cost Plus method (“CPM”), Profit Split (“PS”); and Transaction Net Margin Method (“TNMM”).

Is there a stated preference for any particular TP methods?

The most appropriate method should be used.

Have the documentation requirements of OECD BEPS Action 13 already been implemented (i.e. the LF, MF and CbCR concepts)?

IRAS has not adopted the application of the BEPS LF concepts as separate documents.

The Income Tax (TPD) Rules 2018 stipulate the information Taxpayers must provide in their TP documentation. The information to be provided by the Taxpayers at entity level and group level is largely similar to the OECD LF and MF respectively.

Nonetheless, the information requirements for Singapore TP documentation are largely aligned to the OECD approaches though the details requested are for the applicable Singapore entity. The concept of CbCR has been implemented.

Para 6.25 of the IRAS e-tax Guide on TP Guidelines, first released on 23 February 2006 and updated (6th edition published on 10 August 2021).

Is there any statute of limitation period?

Singapore

Reference to relevant articles of law, legislative regulation or applicable administrative guidance that are in place for TP documentation in general.

Section 34F of the Singapore Income Tax Act (“ITA”) legislates the mandatory requirement for contemporaneous and adequate TP documentation, and penalties for non-compliance from YA 2019 onward.

Chapter 6 (Paras 6.1 to 6.44) of the Singapore TP Guidelines contains detailed guidance on TP documentation.

2. Master File (MF)

What is the (consolidated revenue) threshold requirement for the obligation to prepare a MF?

Unless exemption from TP Documentation for specified transactions applies, Taxpayers must prepare TP Documentation for their related party transactions in a basis period, when either: (a): The gross revenue from their trade or business for the basis period is more than SGD 10 million; or (b): They were required to prepare TP Documentation under Section 34F of the Singapore ITA for the basis period immediately prior to the current basis period.

Once TP Documentation is required, it applies for:

- › Purchases of goods from related parties (≥SGD 15 million (EUR 9,474,022));
- › Sale of goods to related parties (≥SGD 15 million);
- › Loans owed to related parties (≥SGD 15 million);
- › Loans owed by related parties (≥SGD 15 million); or
- › All other categories of related party transactions (≥SGD 1 million (EUR 631,601), e.g. Service income, Service expense, Royalty income, Royalty expense, Rental income, Rental expense), Guarantee income, Guarantee expense).

The SGD1 million threshold is determining separately by aggregating each category of related party transaction.

Exemptions: IRAS has provided administrative concessions where TP Documentation need not be maintained:

- › Transactions with domestic related parties (excluding related party loans) where both parties are subject to the same CIT rates)
- › Domestic related party loans (where the lender is not in the business of borrowing and lending)
- › Routine low value added services where the 5% cost mark-up safe harbour is applied.
- › Related party loans where the indicative margin safe harbour is applied.
- › Related party transactions covered by an APA.

Euro Equivalent

EUR 6,316,010.

From which year does this obligation exist?

When does the MF need to be available?

TP Documentation should be prepared on a contemporaneous basis. IRAS does not require Taxpayers to submit the TP Documentation when they file their tax returns. Taxpayers should keep their TP Documentation and submit it to IRAS within 30 days upon request.

When does it need to be submitted?

The MFs shall be submitted within 30 days based on the request by the tax authority.

Does the MF have to be prepared in the relevant local language?

The TP Documentation needs to be prepared in English. Paragraph 6.40(c) of the 2021 Singapore TP Guidelines specifies that the IRAS may request translation of any TPD not written in English.

Is documentation in English permissible?

Yes.

What are the possible consequences of not having the MF available?

Penalties?

Singapore

Yes, a penalty of up to SGD 10,000 (i.e. USD 7,600 approx.) applies to a Taxpayer who knowingly provides materially false or misleading TP Documentation to the comptroller.

To what extent do the local rules differ from the OECD standard regarding the OECD content requirements for the MF as shown in the BEPS implementation overview chart?

When does the LF need to be available?

TP Documentation should be prepared on a contemporaneous basis. IRAS does not require Taxpayers to submit the TP Documentation when they file their tax returns. Taxpayers should keep their TP Documentation and submit it to IRAS within 30 days upon request.

Same as above.

4. Country-by-Country Reporting (CbCR)

What is the threshold requirement for the obligation to prepare Country-by-Country Reporting?

IRAS has published an e-tax guide on CbCR. Broadly, CbCR is required for an MNE group for financial years beginning on or after 1 January 2017 (but before 1 January 2018), where the Singapore resident ultimate parent entities (UPEs) of the following two types of MNE groups are required to submit a CbCR to the comptroller (or an authorised person):

- › Type A group: an MNE group with consolidated revenues of at least SGD1.125 billion (USD850 million) and has two or more entities that are tax residents in different countries.
- › Type B group: an MNE group with consolidated revenues of at least SGD1.125 billion having a single entity that is tax resident in one jurisdiction, but is also subject to income tax for its business carried out through a permanent establishment in another jurisdiction.

From which year does this CbCR obligation exist?

From 1 January 2017.

Are Taxpayers required to notify of CbCR filing in your country?

With effect from the Financial Year beginning on or after 1 January 2022, Singapore headquartered MNEs having a filing obligation in Singapore will need to notify IRAS on their obligation to file a CbCR within 3 months from the end of their FY.

If yes, when and how do the tax authorities need to be notified?

IRAS will no longer issue notification letters to the reporting entities.

If the reporting entity (ultimate parent or surrogate parent) is in your country, what is the CbCR submission deadline?

12 months from the end of the financial year to which CbCR relates.

Are there any deviating submission deadlines for the secondary mechanism?

No.

Does your country have a requirement that the financial figures of the group need to be aligned with?

No.

Does your country have a requirement that the financial years of the group need to be aligned with?

Yes. Information in the CbCR should reflect on a consistent basis either:

- a) Information for the fiscal year of the relevant group entities ending on the same date as the fiscal year of the reporting entity, or ending within the 12-month period preceding such date (e.g. if CbCR is for reporting entity's FYE 31 December 2017, financial information of group entities having FYE 31 March 2017, 30 September 2017 and 31 December 2017 would be included); OR
- b) Information for relevant group entities for the fiscal year of the reporting entity (e.g. if CbCR is for reporting entity's FY 1 January 2017 - 31 December 2017, financial information of group entities for that same period be included. This can be done by directly identifying financial information of group entities for the period 1 January 2017 – 31 December 2017).

Singapore

Where is the CbCR to be submitted?

For FY beginning on or after 1 Jan 2022, these Singapore MNE groups are also required to notify IRAS of their obligation to file a CbCR, within 3 months from the end of that relevant FY.

How is the CbCR to be submitted, specifically, is there any prescribed standard?

In accordance with the CbCR XML Schema prescribed by the OECD Guidelines and the IRAS' supplementary instructions.

What are the possible consequences of not having the CbCR available?

Penalties?

Yes, a penalty of up to SGD10,000 (USD7,600) applies to the filing of false or misleading CbCR information.

Imprisonment?

Yes, the responsible Taxpayer may also be imprisoned for up to two years.

Shifting of the burden of proof?

No.

Other?

No.

To what extent do your local rules differ from the OECD standard regarding the content requirements for the CbCR as shown in the 2017 OECD TP Guidelines?

Consistent with the OECD requirements.

Did your country sign the Multilateral Competent Authority Agreement on the Exchange of CbCR ("CbCR MCAA")?

Yes.

Did your country enter into other information exchange agreements, such as on a bilateral basis?

Yes.

Can a Taxpayer in your country fulfil his CbCR requirement by referring to the reporting entity in the same or another country?

Singapore has MCAA agreements or has included information exchange provisions in its double tax agreements with most treaty partners.

5. TP disclosure in tax return or TP specific returns

Is there a threshold for Related Party Transactions?

SGD 15 million.

Does a Taxpayer need to disclose information regarding TP documentation in his tax return?

Yes. From YA 2018 (FY2017) onwards, Taxpayers must report certain details of related party transactions if the value of such transactions in the audited accounts for the financial year exceeds SGD15 million (the value of transactions is the sum of all local and cross-border related party transactions (i) in the income statement and (ii) the year-end balances of loans and non-trade amounts).

This is reported in the Form C (submitted with the Tax Return filing) and includes details of related party transactions, values, and related parties. The Form C does not require the Taxpayer to advise whether they have prepared TP Documentation.

When a Taxpayer files a tax return for which he understands or should understand that the result reported in that tax return is too low due to incorrect TP, what could be the legal consequences?

The form for reporting related party transactions is part of Form C of the tax return. This form provides IRAS with relevant information to assess companies' TP risks and to improve enforcement of the arm's length requirement. Failure to comply results in up to SGD5,000; and/or Imprisonment of up to 3 years.

Where the error/omission/discrepancy in the tax return was made with intention to evade taxes, a penalty of up to 400% of the amount of tax undercharged; or a fine of up to SGD50,000; and/or imprisonment up to 5 years.

IRAS will consider individual circumstances (e.g. negligence, compliance history, cooperation during audits, future commitment to compliance etc.) when

Singapore

deciding penalty only in cases where no evidence of any intention to evade taxes.

What could be the consequences for the tax advisor/accountant/administrator drafting and filing the tax return of a client where that advisor/accountant/administrator understands or should understand that the result reported is too low due to incorrect TP?

IRAS takes a serious view of offences by errant tax agents. The IRAS has stated that it will take deterrent actions (e.g. penalties/ fines/ imprisonment) against tax agents who deliberately facilitate their clients' under declaration of taxes, assist in falsifying records or provide objectionable tax advice to clients.

The IRAS will treat any voluntary disclosures of errors in tax returns as mitigating factors and impose lower penalties.

Does a Taxpayer need to file TP specific returns?

There is no TP return required to be filed, either separately or along with the Singapore income tax return.

Please state the filing form number and name.

With effect from YA2018, companies with related party transactions exceeding SGD15 million are required to complete the Related Party Transactions Form and submit it together with Form C. From YA2020 onwards, the Form for Reporting RPT is available as part of the Corporate Income Tax return (Form C).

What would be the filing deadline?

The form for reporting related party transactions is part of Form C and it needs to be submitted together with the tax return. The annual filing deadline for Form C is 30 November.

What would be the penalties for non-compliance?

Penalties may be imposed for non-filing or incorrect filing of Form C. In cases where the error/omission/ discrepancy in the tax return was made without any intention to evade taxes, penalty up to 200% of the amount of tax undercharged.

6. Benchmarking

Is there any local guidance or requirement with regard to the preparation of a benchmark study?

Yes. IRAS provides the following guidance:

- › no preference for commercial database as long as it provides a reliable source of information;
- › Taxpayers should use comparables with publicly available information (preference for listed comparables);
- › if sufficiently reliable local comparables are not available, the search may expand to regional comparables;
- › comparables should be excluded if they have (a) weighted average loss for the tested period; and/or (b) loss incurred for more than half of the tested period;
- › single-year results of the tested party are expected to be compared with multiple-year comparables results;
- › interquartile range is acceptable;
- › no need to conduct a fresh benchmark search each year - although Taxpayers should update their TPD (including benchmark) when there are material changes impacting the functional analysis or TP analysis; and
- › weighted average is preferred over simple average or pooled results.

Is there any stated preference for local benchmarks?

As much as possible, Taxpayers should use local comparables in their comparability analysis. When Taxpayers are unable to find sufficiently reliable local comparables, they may expand their search to regional comparables (such as pan-Asian).

Are there any materiality thresholds that apply to the requirement to have a benchmark study available?

Yes. Singapore provides thresholds for documentation of related party transactions in the TP Documentation. Benchmarking is required for related party transactions that meet these same thresholds unless the transactions meet the conditions for the safe harbours.

7. Year-end, secondary, and corresponding adjustments

Are year-end/ secondary/ corresponding adjustments permissible?

Singapore

Yes, year-end, compensating, self-initiated retrospective and corresponding adjustments are permissible in Singapore (TPG Section 13). Downward year-end adjustments are acceptable if conditions are met (contemporaneous TP Documentation, year-end adjustments are symmetrically applied and adjustments are made before year-end). Self-initiated retrospective adjustments are not permissible unless the adjustments are due to an error under Section 93A (1A) of the ITA.

Does the Taxpayer have to comply with any specific features or guidance?

Yes. Where Taxpayers make year-end adjustments to report arm's length results in the tax return, even if they differ from actual financial results. The IRAS will accept year-end adjustments on the following conditions:

- a. Contemporaneous TP documentation/analyses to establish arm's length prices have been maintained;
- b. Year-end adjustments are made symmetrically in the accounts of all affected related parties; and
- c. Year-end adjustments are made before filing of tax returns.

Even if IRAS has accepted year-end adjustments, it is not precluded from conducting TP audits or making subsequent TP adjustments. Where the conditions are not met, upward adjustments will be subjected to tax. However downward adjustments will not be allowed.

8. TP Audit and Dispute Resolution Mechanisms

What are currently the main TP areas of scrutiny by the tax authorities in your country?

There is none specified.

Based on your experience, are joint or multilateral audits initiated and carried out?

No.

Does the Taxpayer have the option to apply for bilateral or multilateral APAs?

Yes, Singapore has unilateral, bilateral and multilateral APAs.

Are there any restrictions?

Bilateral/multilateral APAs are available to Singapore resident Taxpayers normally for a period of 3 to 5 years and for two prior/rollback years). Taxpayers must:

- › Comply with all requirements pertaining to pre-filing meetings/application processes.
- › Provide access to TP Documentation.
- › Maintain relevant documents and file annual compliance reports to demonstrate compliance with the terms and conditions of the APA agreement together with the income tax returns.
- › Should notify IRAS and relevant foreign competent authority of any breach of the APA conditions as early as possible.
- › Inform IRAS and relevant foreign competent authorities if the matter is adjudicated through legal/ judicial proceedings while the APA process is still ongoing.
- › Provide an impact analysis and proposed course of action to facilitate the competent authorities' evaluation and discussion.

Notwithstanding the APA process, the IRAS is not precluded from conducting an audit on the Taxpayer if there is non-compliance with Singapore tax law.

South Korea

1. Legal Basis

Is there a legal requirement to prepare TP documentation?

With the emergence of the OECD's base erosion and profit shifting (BEPS) project in 2015, the government codified the contents of BEPS Actions 8–10 and 13 into the Korean TP regime. Consequently, new Taxpayer reporting obligations were introduced into the Law for the Coordination of International Tax Affairs ("LCITA"), including preparing and submitting a Local File ("LF"), Master File ("MF"), and country-by-country ("CbCR") reporting ("BEPS reports").

Since when does a TP documentation requirement exist in your country?

Prior to 2016, when the BEPS report became mandatory, the tax authorities could request data on international transactions, which Taxpayers usually submitted in the form of a TP documentation. The scope of the data that the tax authorities can request is currently stipulated in Article 38 of the Presidential Enforcement Decree of the LCITA, which has been in existence since 1995, when the LCITA was first introduced.

Adoption of the OECD or UN legislation in your country?

The LCITA and its subordinating regulations adopted the main contents of the OECD Guidelines but OECD is not directly referred in the law as a binding authority unlike other countries.

Is your country a member of the OECD, Inclusive Framework, or other OECD groups (e.g. BEPS)?

South Korea is a member of the OECD.

Are TP policies of multinational enterprises in principle accepted by the tax authorities, if they are in line with the OECD TP Guidelines?

Although Korea's LCITA reflects the OECD TP Guidelines, it is not possible to include all of them in the Act. Therefore, even if a MNE's TP policy is in line with the OECD TP Guidelines, it is subject to interpretation and application of the pertinent LCITA provisions by the tax authorities, which sometimes leads to a more or less departure from the OECD TP Guidelines.

Which TP methods may be applied?

Article 8 of the LCITA lists 6 methods of calculating the arm's length price, as follows: Comparable Uncontrolled Price ("CUP"); Resale Price ("RPM"); Cost Plus ("CPM"); Transactional Net Margin Method ("TNMM"); Profit Split ("PS"); and other reasonable methods.

Is there a stated preference for any particular TP methods?

There is no hierarchy in application of TP methods and the most appropriate and reasonable method (or, best method rule) should be applied by Taxpayers

Have the documentation requirements of OECD BEPS Action 13 already been implemented (i.e. the LF, MF and CbCR concepts)?

Yes.

Reference to documentation and statements of local-government or tax authorities regarding OECD BEPS implementation status

The Ministry of Economy and Finance puts out BEPS implementation status on a regular basis : <https://english.moef.go.kr/>.

Is there any statute of limitation period?

South Korea

Korea's statute of limitation is generally 5 years but it is extended to 7 years in the case of cross-border transactions.

Reference to relevant articles of law, legislative regulation or applicable administrative guidance that are in place for TP documentation in general.

Article 16 of the LCITA, its subordinating regulations and interpretation set out the TP Documentation requirements including the contents to be included, the submission deadline, etc.

2. Master File (MF)

What is the (consolidated revenue) threshold requirement for the obligation to prepare a MF?

4. Country-by-Country Reporting (CbCR)

What is the threshold requirement for the obligation to prepare Country-by-Country Reporting?

As for the CbCR, ultimate parent companies with sales of KRW1 trillion (roughly EUR 750 million) on a consolidated basis in the immediately preceding year should submit a CbCR.

From which year does this CbCR obligation exist?

Applies since 2016 fiscal year.

Are Taxpayers required to notify of CbCR filing in your country? If yes, when and how do the tax authorities need to be notified?

If the ultimate parent company filing the CbCR is not a Korean company, the information about the foreign parent company filing the CbCR in another jurisdiction (i.e., reporting entity) must be notified to the Korean tax authorities within 6 months after the end of the fiscal year by filling out a form.

If the reporting entity (ultimate parent or surrogate parent) is in your country, what is the CbCR submission deadline?

12 months from the end of each applicable fiscal year.

Are there any deviating submission deadlines for the secondary mechanism?

Does your country have a requirement that the financial years of the group need to be aligned with?

It must be aligned with the same financial years (accounting period) as the ultimate parent company filing the CbCR.

Where is the CbCR to be submitted?

Submit electronically to the AXIS portal operated by NTS: <https://axis.go.kr>.

5. TP disclosure in tax return or TP specific returns

Is there a threshold for Related Party Transactions?

Tangible asset transactions with a value of KRW1 billion or less and other transactions with a value of KRW200 million or less are excluded from TP analysis per LF.

Does a Taxpayer need to disclose information regarding TP documentation in his tax return?

As a part of corporate tax return package, Taxpayers engaged in cross-border transactions with foreign related parties are required to submit the following TP

disclosure forms within 6 months from the end of each fiscal year-end, unless the transaction amount does not reach a certain threshold.

- › an international transaction statement for each foreign related party;
- › a summary income statement of each foreign related party that has cross-border transactions with a Korean Taxpayer; and
- › a form stating the TP method selected and reasons for such selection for each related party transaction – there are separate forms for tangible property transactions, intangible property transactions, service transactions and CCAs.

When a Taxpayer files a tax return for which he understands or should understand that the result reported in that tax return is too low due to incorrect TP what could be the legal consequences?

Taxpayers can file an amended return to pay the underreported tax. This can result in underreporting penalty and additional interest on the amount of tax owed.

What could be the consequences for the tax advisor/accountant/administrator drafting and filing the tax return of a client where that advisor/accountant/administrator understands or should understand that the result reported is too low due to incorrect TP?

There is no responsibility of tax advisor or CPA filing a tax return with regard to the low profit level of Taxpayers attributable to incorrect TP implementation because the responsibility for such incorrect TP implementation lies with Taxpayers or Taxpayers' lack of TP policy.

Does a Taxpayer need to file TP specific returns?

No. However, as mentioned above, Taxpayers are required to submit 3 TP related disclosure forms as part of corporate tax return.

Please state the filing form number and name.

Taxpayers engaging in cross-border transactions with their foreign related parties must file the international transaction statement (Form 16), the foreign related party's summary income statement (Form 17) and a

South Korea

form stating the selection of TP methods and reasons (Form 20).

What would be the filing deadline?

Within 6 months from each fiscal year-end.

What would be the penalties for non-compliance?

If any part of the international transaction statement is not submitted or is false, a fine of KRW5 million may be imposed on each foreign related party with which the Korean Taxpayer had a transaction during the year.

6. Benchmarking

Is there any local guidance or requirement with regard to the preparation of a benchmark study?

Article 7 of the enforcement rules of the LCITA sets out the benchmarking analysis procedure.

Is there any stated preference for local benchmarks?

No. However, Korean tax authorities always expect local comparables extracted from local database called KisValue. Local benchmarks are required where the Korean company is the tested party.

Are there any materiality thresholds that apply to the requirement to have a benchmark study available?

No.

7. Year-end, secondary, and corresponding adjustments

Are year-end/ secondary/ corresponding adjustments permissible?

Yes.

Does the Taxpayer have to comply with any specific features or guidance?

The year-end adjustments are referred to in article 6 of the LCITA. Articles 12 and 13 of the LCITA set out the corresponding adjustments and the secondary adjustments respectively.

8. TP Audit and Dispute Resolution Mechanisms

What are currently the main TP areas of scrutiny by the tax authorities in your country?

The Korean tax authorities have recently focused on challenging domestic sales support service providers on the basis that these service providers should be treated as wholesalers or receive a commission equivalent to the wholesaler's gross margin.

Based on your experience, are joint or multilateral audits initiated and carried out?

No.

Does the Taxpayer have the option to apply for bilateral or multilateral APAs?

Yes.

Are there any restrictions?

No.

Are TP policies of multinational enterprises in principle accepted by the tax authorities, if they are in line with the OECD TP Guidelines?

Sri Lanka is not a member of the OECD. However, the IRD generally refers to the OECD TP Guidelines to resolve matters involving interpretations of its own TP regulations. By the same token, the IRD broadly recognises the pricing methods stipulated in the OECD TP Guidelines.

Which TP methods may be applied?

The TP regulations prescribe the following methods for the determination of the arm's length price: Comparable Uncontrolled Price ("**CUP**"); Resale Price method ("**RPM**"); Cost Plus method ("**CPM**"), Profit Split ("**PS**"); and Transaction Net Margin Method ("**TNMM**").

Is there a stated preference for any particular TP methods?

Have the documentation requirements of OECD BEPS Action 13 already been implemented (i.e. the LF, MF and CbCR concepts)?

Yes, Sri Lanka has adopted the OECD's three tiered documentation approach (i.e., LF, MF and CbCR) set out in BEPS Action 13.
